NOT RECEIVING APEXUS EMAILS?

The most common reason is that your organization's email system is blocking messages from us. But that's usually an easy problem to fix.

ACTION: Please ask your IT department to do the following:

1. Add the domains and email addresses that we use to your internal safe senders list:

   @340Bpvp.com
   @apexus.com
   340Buniversity@340Bpvp.com
   apexusanswers@340Bpvp.com
   340Bpvp@340Bpvp.com

2. Whitelist the IP address that we send emails from:

13.111.54.136	13.111.74.104	159.183.193.109	159.183.213.105
159.183.213.107	159.183.214.96	159.183.213.204	159.183.200.101
149.72.233.170	149.72.90.103	192.254.124.136	

Additionally, please read the **instructions** for adding domains to your personal safe senders list.
